

Triple Injection molding handle

Special three-section injection molding structure handle it produces maximum energy when twisted and optimizes fastening.

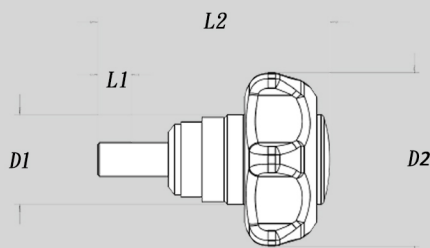

Optimal efficiency

Unique hexagon palm design provides more rotating force.

Universal Flexible

The unique handle features a flexible mechanism, with an internal soft structure, I-Ratchet allows the operator to spin fasteners on and off in hard-to-reach areas.

Item No.	L1	L2	D1	D2	Weight	Material
Itr-001	10.5mm	72mm	28mm	60mm	95g	PP Soft plastic CR-V

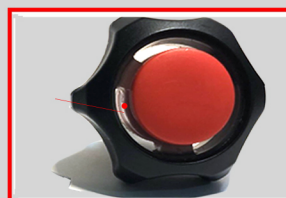

High torque ratchet mechanism

No need to re-hold the handle; one hand operation. Smooth operation ratchet screwdriver with 72 teeth high torque gear for final tightening.

Special positioning Ergonomic, relieve aches

Since the internal soft plastic structure is attached to the part, the risk of sliding screws due to angular deviation is reduced when using the I-Ratchet.

Ergonomics and internal soft material handle provides high torsion and absorbing the physical impact of screw-driving.

Palm grip

Stubby grip fitting the palm, good to use in a confined space.

I-Ratchet
